JOST presents strong products at Automechanika

Drawbar Finder: the smart solution for the coupling process

With the Drawbar Finder, a camera sits in a central and protected position above the towing hitch, functioning as an extra set of eyes and preventing misalignment of the drawbar eye. By providing both horizontal and vertical guidance, it enables precise coupling, which in turn raises efficiency and helps prevent accidents. The driver no longer needs to get out of the truck to check that the drawbar eye is aligned correctly. It is therefore a practical tool for coupling processes, which is a particular advantage when using central axle trailers.

RO*400 Easy Mount: super simple, simply super

With the RO*400 Easy Mount, ROCKINGER is launching a new variant of its standard 40 mm coupling that saves a great deal of time and effort when mounting. The RO*400 Easy Mount with its innovative attachment system is supplied to customers completely pre-assembled: the customer simply has to plug it into the cross bar from the front and tighten the attachment bearing with four screws.

“There is no need to also attach it to the centre nut and its transversal support or to document the torques involved, as was the case before; this makes mounting not only much quicker, but also a lot simpler,” explains Dieter Raab, long-serving Product Manager at ROCKINGER. It also prevents incorrect mounting, in turn enhancing safety. The RO*400 Easy Mount is available now.

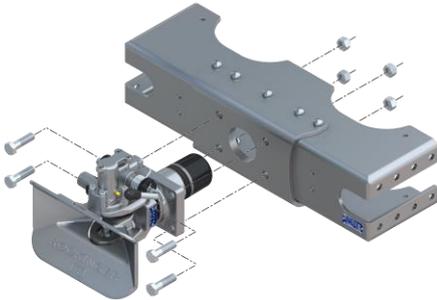

The JOST World stand at this year’s Automechanika can be found at Hall 3.1, Stand D50.

ROCKINGER Easy Mount: RO*400 Easy Mount: the coupling is plugged through the cross bar from the front and fixed in place with just four screws.

About JOST:

JOST is a world-leading producer and supplier of safety-critical systems for the commercial vehicle industry. Under the umbrella brand of JOST, the comprehensive range of products is broken down into systems for applications on the road and in agriculture:

The JOST brand includes fifth wheel couplings, landing gears, ball bearing turntables, king pins and container locks as well as components for alternating systems. Truck and trailer axles are also sold under the JOST brand. The tradition-steeped ROCKINGER brand comprises the core components of towing hitches, drawbar eyes and drawbars for transporters and trucks. TRIDEC offers steering systems and axle suspensions for trailers.

ROCKINGER products are used in agricultural applications. Quicke has been part of the JOST family since February 2020 and specialises in agricultural front-end loaders and equipment.

JOST currently employs over 3,000 staff worldwide and has sales and production sites in over 20 countries and on all five continents. JOST has been listed on the Frankfurt Stock Exchange. Further information on JOST can be found here: www.jost-world.com
